Telephone: 045-543-6800

Notice Regarding the Start of Operation of the Solar Power Generation and Rechargeable Battery System at Yorozu Sustainable Manufacturing Center, Inc.

Yorozu Corporation (hereinafter “the Company”) has completed the installation of mega solar power generation facilities at its domestic subsidiary, Yorozu Sustainable Manufacturing Center, Inc. (hereinafter “YSMC”), located in Wanouchi, Anpachi, Gifu Prefecture. These self-consumption solar power facilities*, with a capacity of 2,310 kW, include rooftop and carport types installed on the factory rooftop and employees’ and visitors’ parking lots. The operation has started in October 2024, in conjunction with the implementation of a new rechargeable battery system.

YSMC has already achieved 100% green energy consumption through a partnership with ShirokumaPower Co., Ltd. (Head office: Minato-ku, Tokyo; CEO: Kanzo Tanimoto). By generating and consuming its own renewable energy through the solar power generator, YSMC aims to further enhance its efforts to add environmental value.

The solar-generated electricity will be partially stored in the newly installed rechargeable battery system, which not only facilitates the use of renewable energy in regular operations but also serves as an emergency power source. The site of YSMC is planned to be utilized as an evacuation shelter for local residents during times of disasters.

Through this initiative, the Company aims to raise environmental awareness and will stay committed to realizing a sustainable society based on its environmental philosophy: We will appreciate the bounty of nature as we pursue growth in harmony with the natural environment.

*Please note that the solar power generation facilities were designed and constructed by ShirokumaPower Co., Ltd. and is operated by NaF LLC (Head office: Minato-ku, Tokyo; Partnership Representative: NCS RE Capital Limited, a wholly-owned subsidiary of NEC Capital Solutions Limited) under the scheme of a Corporate Power Purchase Agreement (Corporate PPA).
