Notice of Ransomware Attack Incident

On the morning of Monday, October 14, 2024 (Japan time), we found that several files stored on some of the Group's servers were encrypted and made inaccessible.

Upon discovery of the incident, we immediately set up a group-wide cybersecurity incident response team at Yokohama headquarters and initiated investigations with the support of third party experts to assess the extent of the impact, the state of damage, and other relevant details. The servers infected with ransomware have been securely isolated from both the internet and the internal network.

We sincerely apologize to our business partners and all relevant parties for the concerns and inconvenience this incident may have caused.

We will promptly issue additional notices if any matters to be disclosed arise.
